- One player or simultaneous two-player competition mode

ZOOM! is endless hours of incredibly fast-paced, arcade action entertainment. When it comes right down to it...

Everyone plays games,
but game players choose to ZOOM!

"Discovery Software International really knows how to take full advantage of the graphics and sound capabilities of the Amiga line of computers. Until haven't met the Arkanoïd, their knock-down-the-blocks type de force, and now there's Zoom!"

—L.R. Shannon, *The New York Times*

"They've gone to the well once again, and come soaring up with another winner. The music is outstanding, as are the digressed sound effects."

—Cleveland M. Blakemore, *Abey's Amiga User*

"There are so many indicatives to the game play of ZOOM! that Discovery Software International should consider marketing ZOOM! to an arcade game manufacturer. . . ZOOM! has an interesting objective, addictive quality (I'm almost kept me from writing this review on time), better-than-arcade quality graphics and sound, and it's easy to play. What more could you ask for?"

—Russ Ceceola, *Commodore Magazine*

"This fast paced game features state of the art graphics and animation, along with some of the best sound you have ever heard from a computer. The game itself is very addicting, and we have the score books to prove it. Contact Discovery. . . and watch the sales come zooming in."

—Computer ShopTalk

• CHOSEN FOR COMMODORE MAGAZINE'S BEST OF 1988 BUYERS GUIDE •

ZOOM! through space on a luminized grid. Hug the corners. Shoot the straight aways. Go for all you're worth! Capture squares on one level and race to the next, racking up the points and the experience you need to succeed. And while you're zooming along, chase down the magic powers that give you bursts of energy and other added strengths. Each level is different, requiring a new strategy and a new approach.

ZOOM! tests your skill and ability to make those lightning quick right moves (and left moves, and forward and reverse moves, too). WOW is this fast. But don't lose your nerve—especially when the dreaded Angichads, Wormlics, and Spheroids are hot on your trail! And watch out for Black Holes!
